Day 18 — Database Connectivity & CRUD API

Topics

- Django models
- Django ORM
- Migrations
- Serializers
- API views or viewsets
- CRUD operations
- Database configuration

Tasks

- Connect the Django application to PostgreSQL/MySQL or use SQLite for initial practice.
- Create a Student model.
- Run database migrations.
- Create serializers and CRUD API endpoints.
- Test database operations through API requests.

Expected Output

- Student CRUD REST API.
- Database connectivity established.
