Day 2 — Python Programming Fundamentals

Topics

- Introduction to Python
- Installing Python and configuring the environment
- Variables and data types
- Operators
- Conditional statements
- Loops
- Input and output
- Basic problem-solving

Tasks

- Install and configure Python.
- Write programs using variables, operators, conditions, and loops.
- Practice programs such as:
    - Check whether a number is even or odd.
    - Find the largest of three numbers.
    - Calculate factorial.
    - Check whether a number is prime.
    - Reverse a number.
    - Print multiplication tables.

Expected Output

- Python environment configured.
- Basic Python programs completed.
