Day 9 — Advanced JavaScript

Topics

- DOM manipulation
- Event handling
- Array methods: map, filter, and reduce
- ES6 features
- Arrow functions
- Destructuring
- Spread and rest operators
- Promises and asynchronous JavaScript
- async and await
- Fetch API basics

Tasks

- Create an interactive webpage.
- Add button-click and form-submission events.
- Display dynamic data using JavaScript.
- Practice array filtering and searching.
- Understand asynchronous operations and API responses.

Expected Output

- Interactive webpage.
- JavaScript DOM and array-method practice.
