Day 12 — React Routing

Topics

- Introduction to React Router
- BrowserRouter
- Routes and Route
- Link and NavLink
- Navigation between pages
- Dynamic route parameters
- Basic 404 page

Tasks

- Install and configure React Router.
- Create Home, About, Students, and Contact pages.
- Navigate between pages without a full page reload.
- Create a basic not-found page.

Expected Output

- Multi-page React application using client-side routing.
